

Dear Sir or Madam:

This is to express my surprise and outrage regarding the NAB petition that seeks to stop satellite radio providers from providing local traffic and weather information. Satellite radio is an innovative, technologically superior way for radio users like myself to access a wide variety of entertainment and news content. It is also a welcome addition to conventional radio stations with their generally poor program quality, limited choice of music and information, and excessive advertising. I therefore feel that any measure to restrict satellite radio services would be anticompetitive and technology-stifling, and would represent a severe infringement of First Amendment rights.

I appreciate your consideration in this matter.

Very truly yours,

Dr. Frank Ochsenfeld
Attorney-at-Law
